SKAGEN seeks to the best of its ability to ensure that all information given in this report is correct, however, makes reservations regarding possible errors and omissions.

The report should not be perceived as an offer or recommendation to buy or sell financial instruments. SKAGEN does not assume responsibility for direct or indirect loss or expenses incurred through use or understanding of the report. Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skills, the fund's risk profile and subscription and management fees. The return may become negative as a result of negative price developments. SKAGEN recommends that anyone wishing to invest in our funds contacts a qualified customer adviser by telephone on +47 51 80 39 00 or by email at contact@skagenfunds.com.

SKAGEN Funds only has authorisation to market its money market fund SKAGEN Høyrente and fund-of-funds SKAGEN Select in Norway. Information regarding these funds is included in the official accounts and audited information hereto. A full overview of where SKAGEN's funds have been registered for public distribution can be found on the last page of this report. The Annual Report 2021 was originally prepared in Norwegian and in accordance with Norwegian requirements for mutual funds (§ 8 Securities Funds Act). This is a translated version that is published with reservations regarding possible errors and omissions as well as erroneous translation. In case of conflict between the Norwegian and the English versions, the Norwegian version shall prevail. The Norwegian version of the Annual Report 2021 is available at www.skagenfondene.no.

BOARD OF DIRECTORS' REPORT FOR SKAGEN'S SECURITY FUNDS 2021

At the end of 2021, SKAGEN AS (SKAGEN) managed combined assets of NOK 73.7 billion divided between five equity funds, three fixed income funds and five fund-of-funds in addition to mirror funds.

SKAGEN's equity funds

At the end of 2021, SKAGEN managed the equity funds SKAGEN Vekst, SKAGEN Global, SKAGEN Kon-Tiki, SKAGEN m2 and SKAGEN Focus. All of SKAGEN's equity funds excepting SKAGEN Kon-Tiki delivered positive absolute returns in 2021, with each recording all-time-highs along the way. SKAGEN Global and SKAGEN Vekst also outperformed their respective benchmarks, the former by its widest margin for over a decade.

Strong company selection – notably Alphabet (Google), Nasdaq and Intuit – helped SKAGEN Global to close the year over 10 percentage points ahead of the MSCI All Country World Index, which it has also outperformed over 3 and 5-year periods. Morningstar ranks the fund's 2021 performance in the top one percent of its peer group, which is an outstanding result¹.

Superior stock picking also propelled SKAGEN Vekst to its best absolute return since 2009, with the fund's three largest holdings providing its top three contributors. Novo Nordisk contributed most significantly with the Danish pharma company continuing to benefit from the positive launch of its new obesity drug Wegovy in the US.

SKAGEN Kon-Tiki was negatively impacted by China's regulatory tightening and concerns for the financial health of the country's sprawling property sector that dragged on returns for EM investors more broadly. Despite being underweight China, the fund's exposure to Ping An, Alibaba and Tencent (via Naspers) outweighed positive contributions from holdings such as UPL and Ivanhoe Mines.

SKAGEN m² generated strong absolute gains as real estate markets surged in 2021. The fund's underweight exposure to the US, which had its best ever year, provided a headwind to relative returns. However, the fund's strong stock picking

was evidenced by a record number of take overs both within and outside its portfolio, including one of the competitors to the fund's largest holding Self Storage Group, which was the best contributor in the fourth quarter.

Underweight exposure to a strong US market also proved challenging for SKAGEN Focus which similarly delivered impressive absolute returns but lagged its benchmark. The small and mid-cap focused fund also saw record M&A activity within its portfolio, which the managers forecast to have over 50% upside.

At the end of the year, SKAGEN managed total assets of NOK 68.6 billion in

equity funds, up from NOK 57.3 billion at the end of 2020.

SKAGEN's fixed income funds

At the end of the year, SKAGEN managed total assets of NOK 5.2 billion in fixed income funds, up from NOK 3.9 billion at the end of 2020. These assets are divided between the bond funds SKAGEN Avkastning and SKAGEN Tellus, and the money market fund SKAGEN Høyrente. SKAGEN Tellus and SKAGEN Avkastning lagged their relative benchmark indices slightly, while SKAGEN Høyrente generated positive risk-adjusted returns ahead of its benchmark index.

RETURNS 2021 (IN NOK) AS OF 31 DECEMBER 2021

Fund Name	Fund	Benchmark

SKAGEN's fund-of-funds

SKAGEN manages five fund-of-funds through the savings profile SKAGEN Select. At the end of the year, these funds managed combined assets of around NOK 2.1 billion. All five SKAGEN Select funds generated positive risk-adjusted returns and beat their respective benchmark indices.

In addition, SKAGEN holds NOK 3.5 billion in third party funds and cash on behalf of clients within the equity savings account (ASK) umbrella.

Fund changes in 2021

On 9 April 2021, SKAGEN switched to end of day pricing for its funds. This means that the net asset value (NAV) of SKAGEN's funds is now based on the closing prices of the securities held in the funds. In practice, this means that the funds' NAVs are published by 9:00 CET the following morning instead of by 19:00 CET the same day, as was the case previously.

In September 2021, SKAGEN's equity funds were reclassified as Article 8 under the EU Sustainable Finance Disclosure Regulation which applies "where a financial product promotes, among other characteristics, environmental or social characteristics or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices". They were previously categorised as Article 6 which covers funds that are not promoted as having ESG factors or objectives.

The move to Article 8 reflects the continued strengthening of SKAGEN's approach to integrating sustainability into its investment process. No changes have been made to the funds' portfolios as a result of the reclassification; however, the funds will henceforth formalise and disclose how environmental and social factors are informing stock selection and subsequent decisions throughout the investment process.

SKAGEN also enhanced the integration of ESG risk analysis into the investment process, which is now built on the following four pillars:

- **Exclusion:** all potential investments are screened and approved against the SKAGEN Sustainable Investment Policy.
- **Enhanced due diligence for companies in high emitting industries:** any investment will be subject to an added due diligence process to identify and assess potential climate risk.
- **ESG factsheet identifying ESG factors:** produced for each investment case and includes a dedicated ESG overview – including material ESG data, potential engagement plan and KPIs as well as a traffic light assessment of overall ESG profile.
- **Active Ownership:** engage and collaborate with holding companies by voicing our views on how to achieve ESG improvements over time.

The result of these changes is greater

rigour in our ESG process and more detailed disclosure on how SKAGEN embeds sustainability in its investment process to achieve the best possible risk-adjusted returns for our clients.

In December 2021, the Norwegian Financial Supervisory Authority (FSA) approved the proposed amendment to the management fee of SKAGEN Global, unit classes A and B. The amendment relates to §7 of the Articles of Association of SKAGEN Global, unit classes A and B, by extending the reference period for calculating the performance fee from one to five years. As a result, the fund now has to recuperate any underperformance over a longer time period than previously before any variable management fee can be charged. This change is to the benefit of unit holders. The amendment followed new guidelines from the European Securities and Markets Authority (ESMA) which come into force at the beginning of 2022. The guidance recommends aligning the fee calculation period with a fund's recommended time horizon. The fee change comes into force on 1 January 2022.

As of the end of 2021, SKAGEN has offices in Norway, Sweden, Denmark, the UK and Germany and also permission to market its funds in Finland, Iceland, the Netherlands Luxembourg, Ireland, France, Belgium and the Faroe Islands. Unit holders are divided between retail clients (38%), distribution clients (52%) and institutional clients (10%).

Environmental, social and governance (ESG) factors

In SKAGEN we believe in exercising our rights as shareholders. Proxy voting gives us the opportunity to vote without being physically present at meetings. As active investors we feel that it is important to vote to address concerns and influence companies in a direction that we believe is sustainable.

In 2021, there were 248 voteable meetings at our portfolio companies, with 2,936 voteable items on the agenda. SKAGEN voted on 99.9% of the items, which is more than two percent up from the previous year. Votes were cast in line with management recommendations 94% of time, while 6% of the time SKAGEN voted against management recommendations on one or more items on the agenda.

Cases in which SKAGEN voted against management were typically related to:

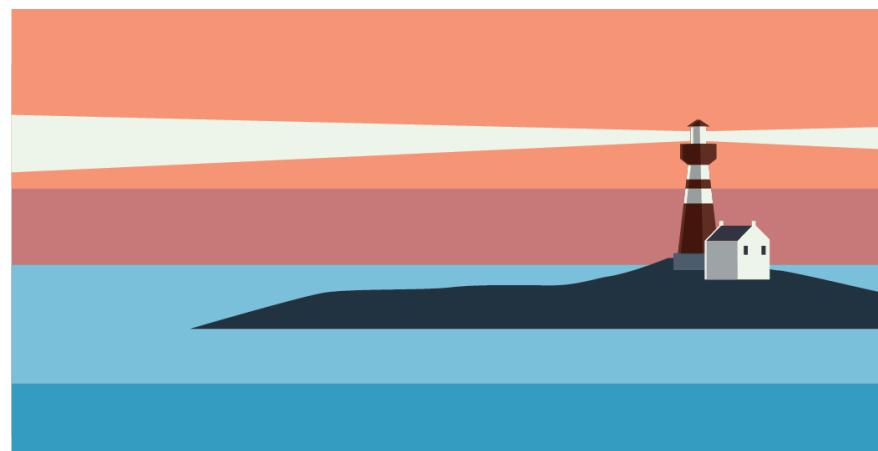

- Insufficient information ahead of meeting
- Quality of the board and its members, including diversity of board members
- Anti-takeover mechanisms
- Needless or unfair changes in capital structure
- Excessive executive compensation
- Insufficient disclosure proposals related to climate change
- Insufficient disclosure proposals related to human rights
- Insufficient disclosure proposals related to environmental harm, such as deforestation, plastics, etc.

Information about voting is published on the SKAGEN website. For further information about our work with ESG throughout 2021, please read SKAGEN's Quarterly and Annual Sustainability Reports.

Market review and outlook

After a volatile 2020, stock markets found relative calm in 2021 and continued to provide very decent gains for investors. The MSCI All Country World Index reached several new highs before closing 26% higher for the year, although underlying performance was far from even, particularly between markets. The disparity between developed (+29%) and emerging markets (+2%) was the largest for almost a decade, largely driven by the contrasting fortunes of a persistently strong US and a very weak China, which make up large weightings of the respective indices².

Sector performance was more equitable with all delivering double digit returns.

Energy recovered from being the worst performer in 2020 to the best in 2021 (+55%), while the performance of real estate (+43%) and financials (+35%) also reversed significantly from the previous year³. This helped value to finish 2021 slightly ahead of growth for the first time since 2016, with particularly strong momentum in the first half and fourth quarter⁴.

Although volatility fell to more normal levels, the VIX 'fear gauge' remained above average for the second year running as the pandemic continued to cast a shadow across most markets. Companies ploughed ahead regardless, reporting higher profits as demand rose in most sectors. Shortages of commodities and labour, however, meant supply chains struggled to keep pace and inflation overtook COVID as investors' biggest worry.

Central bankers appeared less troubled by rising prices and largely maintained international stimulus programs. It seems inevitable that liquidity taps will be tightened in 2022, however, and we have already seen the market react strongly to more restrictive monetary policies at the start of the year.

It is clear that equity markets face challenges in the year ahead and will do very well to deliver returns anywhere close to those achieved in 2021. Geopolitical risks have come to the fore, notably from Russia whose invasion of Ukraine took many by surprise and has rightly been fiercely condemned by the international community, which has imposed strict Russian sanctions. The situation is very distressing with tragic human suffering and remains highly uncertain; one can only hope that a means to de-escalation can somehow be found, however unlikely that appears at the time of writing.

Following the Russian invasion of Ukraine, SKAGEN decided to freeze Rus-

sian investments and divest from the country, in line with the rest of the Storebrand Group. The decision followed similar action by Norges Bank Investment Management to exclude Russian investments at the behest of the Norwegian government. SKAGEN's funds with direct exposure to Russia are SKAGEN Kon-Tiki and SKAGEN Vekst, whose Russian holdings accounted for 8.7% and 4.5% of their portfolios respectively at the start of February 2022. We have since written these investments down to zero in anticipation of a near total drawdown in the value of these positions. Given that the invasion took place in February 2022, these events do not impact the financial statements as of 31 December 2021, nor do they present any issues with regard to the going concern of the funds.

While events in the Ukraine appear to have strengthened relations in Europe, they have also highlighted the relative global weakness of the US, which continues to face domestic challenges. Elsewhere, North Korea has recommenced its missile testing in 2022 after a period of relative calm while Turkey's economic problems may yet trigger broader social difficulties, particularly if they deteriorate further.

More positively, global GDP is forecast to grow 4.4%⁵ this year and the further expansion in economic activity should remain supportive for company earnings, particularly as COVID has thankfully retreated in many countries. This should also provide a welcome boost for emerging markets, many of whom have not yet benefitted from a reopening of their economies, even if a fairer distribution of COVID vaccines in 2022 may be too much to hope for.

With central banks belatedly sharing investors' concerns over inflation, interest rates have already started to rise in several countries, notably the US. This could accelerate the rotation from growth

to value stocks we have seen so far in 2022, particularly if further tightening can be achieved without choking economic growth. The change in equity markets this year has seen stock correlations falling and dispersions rising, both of which should be supportive for stock pickers.

A fairly safe prediction is that volatility will remain elevated in 2022, particularly for companies and markets trading at the highest valuations. This also creates opportunities, and we are confident that our funds remain well-positioned to deliver attractive risk-adjusted returns for our investors. The shift towards a greener, more sustainable environment also offers positive openings for companies in many different sectors and countries, and we believe this trend will be supportive long-term for SKAGEN funds.

Risk management in SKAGEN's mutual funds

Investing in mutual funds entails risk related to future value development. Investors may therefore receive higher or lower returns than expected, and may also make a loss on investments. Nevertheless, a general characteristic of mutual funds is that risk is diversified across many different investments in different sectors and geographical regions. This diversification is expected to benefit clients over time and their returns should be higher relative to the risk of buying single stocks or bonds.

SKAGEN monitors and measures risk in the mutual funds in accordance with Norwegian laws and regulations. All of SKAGEN's funds have risk profiles approved by the Board. The Board and the Managing Director regularly receive risk reviews from SKAGEN's independent risk management function.

SKAGEN's mutual funds are also exposed to liquidity risk, i.e. the risk that the funds' investments cannot be converted to cash within an expected timeframe or at an expected price. The risk is limited by monitoring the volumes sold, having an extensive counterparty network as well as the possibility to trade outside the market. In addition, certain cash reserves are maintained in the funds as well as a loan facility in order to meet

large client redemptions.

SKAGEN does not hedge currency exposure in the equity funds. Currency risk is integrated in our investment analysis of each portfolio holding and evaluated along with all other risk factors. SKAGEN seeks to minimise risks through portfolio diversification. SKAGEN Avkastning hedges the foreign investments versus NOK and hence has no currency risk. For SKAGEN Tellus, currency is a part of the investment mandate and the fund takes active currency investments based on analysis of different currencies' current and expected value relative to EUR.

The fixed income funds' investments are based on analyses of each issuer's creditworthiness and the economic, macro political and institutional circumstances of the country in which the bond is issued. Credit risk is reduced by increasing demands in terms of credit worthiness and type of issuer. Counterparty risk is reduced by seeking delivery on payment and by monitoring brokers' credit ratings and accounts.

Internal control and compliance

Fund management also entails operational risk, typically associated with inadequate or failing internal processes or systems, human error or external events. Operational risk is managed by, amongst other things, maintaining focus on good processes, routines and systems, continuous training of employees, communication measures as well as updating and drawing lessons from event registers. Incidents are evaluated continuously, with an increased focus twice a year in an internal control process involving the managers responsible for all areas of activity.

SKAGEN is outsourcing certain common functions and tasks to other entities within the Storebrand Group. The outsourcing covers management of SKAGEN Høyrente, IT development and operations, securities settlement, fund accounting, calculation of net asset value, unit holder settlement and unit holder register for SKAGEN's funds, sales and service towards professional clients in Norway, Sweden and Denmark. SKAGEN remains responsible for risk management and internal control of all outsourced activities.

In line with relevant regulation and the Storebrand Group policy, SKAGEN has an independent Compliance Officer and Risk Officer. These two functions work independently of SKAGEN's main reporting lines, reporting directly to the Board in addition to the CEO, to comply with regulatory requirements. Both functions also report to the Storebrand Group CRO, and are included in the Group's compliance and risk forums.

SKAGEN is also the appointed investment manager for the SKAGEN sub-funds and the global sub-distributor for all sub-funds within the Storebrand SICAV domiciled in Luxembourg.

Administrative conditions

The mutual funds have no employees. The company does not pollute the environment. All the mutual funds are managed by SKAGEN and have JP Morgan as their custodian. SKAGEN's head office is located in Stavanger, Norway.

Going concern

The Board confirms that the premise of the funds and the management company as going concerns continues to be fulfilled.

General notes 2021

NOTE 1: ACCOUNTING PRINCIPLES

All figures in NOK 1,000 unless otherwise stated.

The accounts for 2021 are prepared in accordance with the Norwegian accounting law and regulation for annual financial statements for securities funds.

Financial instruments:

All financial instruments are valued at fair value. The valuation method will depend on the financial instruments' characteristics as well as the relevant market.

In SAM, listed instruments will generally be valued using the last official price as well as the latest purchase and sales price distributed by the relevant stock exchange.

The use of quoted prices is relevant for instruments where purchase and/or sales prices are quoted regularly by one or more brokerages. This primarily relates to bonds outside Norway. For Norwegian bonds, prices delivered by Nordic Bond Pricing will mainly be used.

For funds, official NAV prices will be used where available.

For financial instruments where it is not possible or desirable to use the above methods, theoretical models are used for calculating an assumed market value. This will typically apply for most OTC instruments as well as some illiquid bonds.

Further information can be found in SAM's routine "Valuation principles for financial instruments".

Derivatives:

Derivatives can be used to reduce the funds' risk.

Realised gain and loss:

Upon realization of the investments, accounting gains and losses are calculated based on acquisition cost.

Currency gains/losses that are not related to securities appear as other portfolio income/expenses.

Transaction costs:

Transaction costs for the purchase of securities (brokerage fees to brokers and other costs) are capitalized as a part of the cost price of the security and follow the realization principle.

Allocation to unit holders:

For fixed income funds, taxable profit, consisting of interest income, realized gain / loss and other income less management fees and transaction-driven costs, is distributed to unit holders as at 31 December.

All allocation to unit holders in fixed income funds is treated as profit allocation in accordance with the regulations pertaining to annual accounts for mutual funds.

Swing pricing:

SKAGEN employs swing pricing routines to prevent existing unit holders from being negatively impacted as a result of subscriptions and redemptions made by other unit holders in the fund. The value of the fund is adjusted by a swing factor on days when the fund has had a net subscription or redemption.

The limit for adjusting the value of the fund is set at that level that net subscriptions or redemptions are expected to cause the fund to make portfolio adjustments that incur transaction costs, spread costs (the difference between the purchase and sale prices of underlying securities) and currency costs. If the fund has a net subscription beyond this limit, the value of the fund is adjusted upwards or downwards if the fund has had a net redemption above this limit. The swing factor is calculated based on average historical costs, and evaluated quarterly.

Covid-19 impact:

SKAGEN, like other companies, now has considerable experience of working through a pandemic. Good routines were established in 2020 and these have, despite the emergence of new variants such as Delta and Omicron, helped to ensure that there has been little direct impact on the management and operation of the funds through 2021. There is still market volatility as a result of Covid-19, but to a much lesser extent thanks to increasing vaccine coverage and more knowledge related to the pandemic's impact on the economy.

Impact of Russian invasion of Ukraine:

Subsequent to the reporting period, Russia invaded Ukraine and SKAGEN decided to freeze Russian investments and divest from the country, in line with the rest of the Storebrand Group. The decision followed similar action by Norges Bank Investment Management to exclude Russian investments at the behest of the Norwegian government. SKAGEN's funds with direct Russia exposure are SKAGEN Kon-Tiki and SKAGEN Vekst which suffered a near total drawdown in their Russian holdings that accounted for 8.7% and 4.5% of their portfolios respectively at the start of February. At present it is not possible to provide a detailed assessment of the emerging risk on the funds' investments, but there is growing concern about the impact on the economy worldwide and financial markets, particularly if the conflict escalates or expands beyond Ukraine. Given that the invasion took place in February 2022, these events do not impact the financial statements as of 31 December 2021, nor do they present any issues with regard to the going concern of the funds.

Remuneration Scheme:

The company's remuneration scheme is determined by the company's Board of Directors, and is reviewed and checked by the company's internal auditor on an annual basis.

The company's remuneration scheme is designed to promote good and efficient risk management and ensure that management acts in accordance with the investment mandates of the mutual funds managed and prevent risk taking that is incompatible with the funds' investment strategy. Furthermore, the scheme must ensure accountability and long-term perspective. All SKAGEN AS employees have a fixed remuneration and the possibility of variable remuneration. Variable remuneration paid in 2022 was earned based on the company's operating profit in 2021. A fixed share is shared among a group of employees (partners) while the remaining share is distributed on a discretionary basis. All employees can also receive a discretionary variable remuneration. Variable remuneration for compliance and risk managers is not based on the company's operating profit, but on the basis of individual assessment. The company's management team, portfolio managers and the company's compliance and control function were in the financial year 2021 (payment year 2022) subject to special requirements for the withholding of variable allowance. SKAGEN AS withholds 50% of the variable remuneration with payment in three equal parts over the following three years. Withheld bonus is invested in the company's securities funds. 28 of the company's employees are subject to the remuneration scheme's requirement for withheld variable remuneration.

Category	No. of employees	Fixed remuneration	Variable remuneration	Total in 2021
A: Leader group incl CIO	7	11982	10313	22295
B: Portfolio managers, risk, compliance and legal	17	25158	34319	59477
C: Employees with direct sales duties	22	20478	3192	23670
Total	46	57618	47824	105442

SKAGEN Vekst Notes 4, 5, 6, 7, 8 and 9

NOTE 4: CUSTODIAN COSTS, BROKER'S FEES AND OTHER FEES

Transaction costs for the purchase of securities (brokerage to brokers) are capitalized as part of the cost price for the security and follow the realization principle.

Transaction costs:

2021	2020
818	2080

NOTE 5: TURNOVER RATE

The turnover rate is calculated as the minimum of the year's purchases and sales, divided by average total assets.

Turnover rate:

2021	2020
0,31	0,38

NOTE 6: MANAGEMENT FEE AND COMMISSION

The management fee is calculated in percent of the daily assets under management.

Unit class	Management fee p.a.	Currency
SKAGENVekst A	1,00%	NOK
SKAGENVekst B	0,80%	NOK
SKAGENVekst C	0,60%	NOK

In addition, unit classes A and B are charged a variable management fee of 1/10 of the return above 6 percent p.a. measured in Norwegian kroner, as long as the unit value on 31.12 is more than the unit value the last time the fund was charged a variable management fee (high watermark). Unit class C is charged a variable management fee of 1/10 of the better value development in the unit value than the balanced and continually rebalanced index composed of the MSCI Nordic Countries IMI Index and the MSCI All Country World Index ex Nordic Countries (Daily Total Return Net \$ measured in Norwegian kroner). The variable management fee in class C is charged/calculated only if the accumulated relative value development from the previous charge/calculation up to and including 31 December is greater than zero.

NOTE 7: NUMBER OF UNITS (IN WHOLE FIGURES)

Unit class	31.12.2021	31.12.2020	31.12.2019
Number of units	SKAGENVekst A	2317 496	2414 704
Number of units	SKAGENVekst B	70 107	496
Number of units	SKAGENVekst C	71 556	98 125
Redemption price	SKAGENVekst A	3 685	2 937
Redemption price	SKAGENVekst B	3 744	2 982
Redemption price	SKAGENVekst C	3 908	3 053

NOTE 9: KEY FIGURES

Active share compares the fund's investments with those of the benchmark index and expresses how much of the fund's portfolio deviates from the fund's benchmark index. The calculation is made by summing up the absolute difference between the weight of assets in the fund against the weight of assets in the benchmark index. The measurement of the key figure is based on the issuer level and portfolio composition as of 31.12.2021. The cash balance is considered an asset in line with other assets in the fund.

Tracking error	7,22%
Active share	86,05%

SKAGEN Focus Notes 4, 5, 6, 7, 8, 9 and 10**NOTE 4: CUSTODIAN COSTS, BROKER'S FEES AND OTHER FEES**

Transaction costs for the purchase of securities (brokerage to brokers) are capitalized as part of the cost price for the security and follow the realization principle.

Transaction costs:

2021	2020
873	1002

NOTE 5: TURNOVER RATE

The turnover rate is calculated as the minimum of the year's purchases and sales, divided by average total assets.

Turnover rate:

2021	2020
1,03	0,77

NOTE 6: MANAGEMENT FEE AND COMMISSION

The management fee is calculated in percent of the daily assets under management.

Unit class	Management fee p.a.	Currency
SKAGEN Focus A	1,60%	NOK
SKAGEN Focus B	1,30%	NOK
SKAGEN Focus C	1,00%	NOK
SKAGEN Focus D	1,60%	NOK

In addition the four unit classes are charged a variable management fee of 1/10 better value development in the unit value than the benchmark index MSCI All Country World Daily Total Return Net \$ measured in Norwegian kroner. The variable management fee is calculated daily and charged yearly on 31 December for all four unit classes. In the event of poorer value development in the unit value than the benchmark index, 10 percent of the underperformance is deducted from the fixed management fee. The total management fee therefore has an upper and a lower limit, so the combined fee may not exceed 3.2 percent p.a. and may not be less than 0.8 percent p.a. of the average assets under management in unit classes A and C. In unit class B the corresponding upper limit is 2.9 percent p.a. and lower limit is 0.5 percent p.a. For unit class D the corresponding upper limit is 3.2 percent p.a. and lower limit is 0 percent p.a.

NOTE 4: CUSTODIAN COSTS, BROKER'S FEES AND OTHER FEES

Transaction costs for the purchase of securities (brokerage to brokers) are capitalized as part of the cost price for the security and follow the realization principle.

Transaction costs:

2021	2020
7	8

NOTE 5: TURNOVER RATE

The turnover rate is calculated as the minimum of the year's purchases and sales, divided by average total assets.

Turnover rate:

2021	2020
0,11	0,26

NOTE 6: MANAGEMENT FEE AND COMMISSION

The management fee is calculated in percent of the daily assets under management.

Unit class	Management fee p.a.	Currency
SKAGENSelect 60	0,10%	NOK

The management fee that is charged in the underlying funds will come in addition. If all the underlying funds deliver a return that is in line with their respective benchmark indexes, the total annual cost is expected to be 0.97 percent. The actual total annual cost may be higher or lower than this, depending on the underlying funds' relative performance from year to year. The annualised cost for 2021 was 1.26 %. The total management fee in the fund and underlying funds may not exceed 4 percent per year.

818534752	SKAGEN Select 60
918534814	SKAGEN Select 80
990009651	SKAGEN Tellus
879876052	SKAGEN Vekst

The financial statements for mutual funds comprise the balance sheet as at 31 December 2021, the income statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion

- the financial statements comply with applicable statutory requirements, and
- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2021, and its financial performance for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company as required by laws and regulations and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The Board of Directors in the management company (management) is responsible for the information in the Board of Directors' report. The other information comprises information in the annual report, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the information in the Board of Directors' report.

In connection with our audit of the financial statements, our responsibility is to read the Board of Directors' report. The purpose is to consider if there is material inconsistency between the Board of Directors' report and the financial statements or our knowledge obtained in the audit, or whether the Board of Directors' report otherwise appears to be materially misstated. We are required to report if there is a material misstatement in the Board of Directors' report. We have nothing to report in this regard.

Based on our knowledge obtained in the audit, it is our opinion that the Board of Directors' report

- is consistent with the financial statements and
- contains the information required by applicable legal requirements.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern. The financial statements use the going concern basis of accounting insofar as it is not likely that the enterprise will cease operations.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee

that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

For further description of Auditor's Responsibilities for the Audit of the Financial Statements reference is made to <https://revisorforeningen.no/revisjonsberetninger>
