

## Performance Commentary

The fund ended the month substantially behind global equity markets. The main negative contributor was Teva Pharmaceuticals, one of the world's largest sellers of generic drugs. The company announced weaker than expected Q2 numbers and lowered guidance. While the miss in itself and lowered guidance were not huge, the real issue lies in the financial leverage following an ill-timed acquisition made a couple of years ago. Teva will have to de-lever its balance sheet and re-establish an experienced management team. Nevertheless, we believe Teva has a decent chance of coming out stronger than before in the mid-term as the number of generic players will effectively be reduced in the new pricing environment. On the positive side, we have seen favourable developments in our Eastern European beverage producer Stock Spirits, which rallied almost 50% after reporting stabilising market shares and core profitability. The Brazilian food company JBS also continued to make a strong comeback, and is now up 45% (in BRL) since mid-June, making its way back into a top-10 position.

We sold out of E-mart as the position reached our target price. We initiated a new position in the US financials sector, which will be highlighted in coming updates.

The fund is a concentrated global equity fund with a mandate to invest in all cap-sizes, geographies and sectors globally. With our concentrated portfolio of 30-35 core positions, we aim to generate absolute returns at a controlled level of absolute risk.
