

Performance Commentary

We continued to see a strong EM-supportive environment in January, thanks to firming global growth and commodity prices. Robust EM equity inflows helped EM outperform global markets. However, a surge in US treasury yields has set the stage for increased market volatility through a bounce in the VIX index. We reduced exposure to some recent outperformers like Tullow, Rumo, Bollere, Cosan and Gree Electric. We exited Eczacibasi Ilac. Four new companies entered the portfolio: Sinotrans is the leading integrated logistics provider in China trading at a big discount to the industry. Aeroflot is the dominant Russian flag carrier; an improving balance sheet and a cyclical recovery gives an attractive risk/reward. We expect Bank of China to rerate after concerns over the debt build-up in China and deteriorating financial performance abates with an improved economic backdrop. Lastly Beijing Enterprise Water is one of the leading providers of water and environmental protection services in China. The recent capital raise coupled with improved earnings quality and a cash flow inflection point should lead to a re-rating. We continue to see around 30% upside for the Kon-Tiki portfolio. Trading at less than 10x 2018e P/E and 1.1x P/B this is at a substantial discount to EM at 12x and 1.9x.

The fund selects low-priced, high-quality companies, mainly in emerging economies.

The objective is to provide the best possible risk adjusted return.

The fund is suitable for those with at least a five year investment horizon.

Important information

Unless otherwise stated, performance data relates to class A units and is net of fees. Except otherwise stated, the source of all information is SKAGEN AS. Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skills, the fund's risk profile and subscription and management fees. The return may become negative as a result of negative price developments. You can download more information including subscription/redemption forms, full prospectus, Key Investor Information Documents (KIID), General Commercial Terms, Annual Reports and Monthly Reports from our local websites or our local representatives. Statements reflect the portfolio managers' viewpoint at a given time, and this viewpoint may be changed without notice. This report should not be perceived as an offer or recommendation to buy or sell financial instruments. SKAGEN AS does not assume responsibility for direct or indirect loss or expenses incurred through use or understanding of this report. Employees of SKAGEN AS may be owners of securities issued by companies that are either referred to in this report or are part of a fund's portfolio.

The benchmark index is the MSCI EM Index (net total return), this index did not exist at the inception of the fund and consequently the benchmark index prior to 1/1/2004 was the MSCI World AC Index. This is not reflected in the table/graph above which shows the MSCI EM Index since the funds inception.
