

## Performance Commentary

Global markets rebounded from March lows as the spread of COVID-19 appeared to come under control and investor focus shifted to the global fiscal and monetary stimulus that has since been unleashed. However, as we feel the situation remains highly uncertain, we have spent time reassessing our financial forecasts accordingly.

The fund performed well in April driven by Indian agrochemical producer UPL after the company gave a positive update on its deleveraging progress and current trading. Ivanhoe Mines rebounded along with commodity prices as it confirmed that its key mine development project Kamo-a-Kakula in the DRC remains on track for 2021. Land-based salmon producer Atlantic Sapphire also remains on track and confirmed that it will move to a full listing on the Oslo stock exchange, further broadening its potential investor base. The fund's detractors in April all came from the energy sector, which continues to suffer from the fallout of reduced activity levels and a lower oil price. Golar fell as BP claimed force majeure on the Tortue LNG project, while Euronav fell back due to volatile tanker rates. We exited our position in Shell due to a significantly reduced dividend outlook.

The portfolio remains attractively valued on 12x 2020 P/E and 0.8x current P/B.

The fund selects low-priced, high-quality companies, mainly in emerging economies.

The objective is to provide the best possible risk adjusted return.

The fund is suitable for those with at least a five year investment horizon.

## Important information

Unless otherwise stated, performance data relates to class A units and is net of fees. AUM data as of the end of the previous month. Except otherwise stated, the source of all information is SKAGEN AS. Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skills, the fund's risk profile and subscription and management fees. The return may become negative as a result of negative price developments. You can download more information including subscription/redemption forms, full prospectus, Key Investor Information Documents (KIID), General Commercial Terms, Annual Reports and Monthly Reports from our local websites or our local representatives. Statements reflect the portfolio managers' viewpoint at a given time, and this viewpoint may be changed without notice. This report should not be perceived as an offer or recommendation to buy or sell financial instruments. SKAGEN AS does not assume responsibility for direct or indirect loss or expenses incurred through use or understanding of this report. Employees of SKAGEN AS may be owners of securities issued by companies that are either referred to in this report or are part of a fund's portfolio.

The benchmark index is the MSCI EM Index (net total return), this index did not exist at the inception of the fund and consequently the benchmark index prior to 1/1/2004 was the MSCI World AC Index. This is not reflected in the table/graph above which shows the MSCI EM Index since the funds inception.
