SKAGEN Part of Storebrand

Performance Commentary

Fear returned to the markets in May. The escalation of the trade war led to a massive flight to safety. The US 10-year yield fell by 40 basis points in May, mostly towards the end of the month. The German 10-year yield fell by 23 basis points and is now back in negative territory. The Japanese yen appreciated by 3.25 percent.

May was a difficult month for Tellus, in particular on a relative basis. Both the fund's underweight in JPY and duration in large developed economies led to a significant underperformance relative to the index.

Greece was the best performer in May. After a turbulent start to the month, the rates fell sharply after the conservative New Democracy party won the European Parliament elections. The election defeat of the government party Syriza meant that Prime Minister Tsipra called for early elections. The market believes and hopes that the conservative party will win the election.

Chile was the weakest performer due to a fall in the copper price.
