Prior to subscription, we encourage you to read the fund's prospectus and key investor information document which are available at [www.skagenfunds.com](http://www.skagenfunds.com), from our local representatives and from our distributors.

## Performance Commentary

The horrific events unfolding in Ukraine overshadowed all other events in February. In financial markets, credit spreads increased significantly across the board and our euro positions in particular saw credit spreads jump sharply. At the same time, safe-haven assets such as US, Eurozone, and Norwegian government bonds performed strongly as interest rates in these regions fell. The outlook for the world economy – and primarily the European economy – has become more uncertain after the outbreak of full war in Ukraine. This makes the way forward for central banks more challenging. On the one hand, the war will push consumer prices even higher while it on the other it is likely to put a dent in demand and thereby economic growth. Nevertheless, central banks will likely go ahead with their monetary policy tightening but we might see more caution especially in Europe. SKAGEN Tellus underperformed its benchmark index in February. The largest positive contributors were our supranational exposures denominated in BRL and IDR driven by appreciating currencies while the main laggards were Romania and Serbia driven by the large increase in credit spreads.

SKAGEN Tellus invests primarily in bonds and certificates issued or guaranteed by governments from around the world. The fund is suitable for those with at least a three year investment horizon. Investors must be able to tolerate currency fluctuations. The fund is suitable for those with at least a five year investment horizon. Subscriptions are made in fund units and not directly in stocks or other securities. The fund has risk profile 4. The benchmark reflects the fund's investment mandate. Since the fund is actively managed, the portfolio will deviate from the composition of the benchmark.

## Historical performance (net of fees)

Period	SKAGEN Tellus A	Benchmark index

## Performance last ten years

Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skill, the fund's risk profile and management fees. The return may become negative as a result of negative price developments. There is a risk associated with investing in the fund due to market movements, currency developments, interest rate levels, economic, sector and company-specific conditions.
